

Coadd™ D-6028

Dispersing Agent

DESCRIPTION

Coadd™ D-6028 is a solution of hydrophilic modified polyacrylic ammonium salt. The product has good dispersing performance and compatibility. Excellent balance between water resistance and dispersing performance, can be used in both organic and inorganic colorants/fillers. The product also has good color acceptance and low level of foaming when used in colorants. Compatible with both HASE and HEUR rheology modifiers.

PHYSICAL PROPERTIES

Appearance	Light yellow liquid
Density (g/ml)	1.12
Active content (%)	49
pH	6.5 – 8.5
Viscosity (mPa.s, 25°C)	<1000

Note: These properties are only typical, and do not represent product specifications

APPLICATION CHARACTERISTIC AND ADVANTAGES

Coadd™ D-6028 is a universal dispersant, recommended in water-borne architecture coating and industrial coatings. It is suitable in both high gloss to flat, with good water resistance and chemical resistance, as well as good color acceptance and storage stability. The product possesses:

- Excellent dispersibility
- Universal
- High solid content, high price & cost ratio
- Excellent color acceptance
- Excellent compatibility
- Good water resistance and scrub resistance

Suggested dosage (base on the total pigment content): 0.5-1.0%. Optimum level of dosage are determined via laboratory tests.

SAFETY NOTICE

Before using the products, please refer to SDS for detailed safety data, handling and storage procedures recommended.
