

## Coadd™ D-6270

### Aqueous Pigment Dispersant

## DESCRIPTION

**Coadd™ D-6270** is a 100% active non-ionic polymer pigment dispersant which improve dispersion stability and color acceptance in aqueous coating and ink formulations. Especially in organic pigment and carbon black, Coadd™ D-6270 is excellent high pigment loading capacity and good flow properties in color pastes.

## PHYSICAL PROPERTIES

Appearance	Pale yellow to amber liquid
Density (g/ml)	1.08
Active content (%)	100
Flash Point(°C)	>100

Note: These properties are only typical, and do not represent product specifications

## APPLICATIONS

- Building and Construction Coatings
- Printing Inks
- Color Pastes
- Aqueous Industrial Coatings

## CHARACTERISTIC AND ADVANTAGES

**Coadd™ D-6270** is strong reduce surface tension and fast wetting performance on the surface of pigments.

With excellent color strength, color development, milling efficiency, coloristic improved.

The suggested dosage (base on the total weight of pigments):

Organic pigments: 10-30%.

Carbon black: 15-35%.

The viscosity is higher and amber, or solidified partially when temperature lower than 10℃, it is not effect on the performance.

## SAFETY NOTICE

Before using the products, please refer to SDS for detailed safety data, handling and storage procedures recommended.

## DISCLAIMER

It is common proposal for product usage and demand above information based on our professional knowledge. Due to environmental uncertainty and out of our control from practical process, please test and make evaluation ahead of use to ensure efficient and safe. For your reference, the above information is only for commonly know and use the product. It is guaranteed to meet quality and product specification.
