

Coadd™ DF-6022

Defoaming Agent

DESCRIPTION

Coadd™ DF-6022 is a modified polysiloxane type defoamer, and is recommended for water-borne coatings, printing inks and adhesives applications. The product has excellent bubble bursting and micro foam elimination efficiency, while has wide pH and temperature range adaptability. It is easily dispersed in water, and also easy in handling.

PHYSICAL PROPERTIES

Form	Colorless to light yellow liquid
Density (g/ml)	1.02
Active content (%)	100
Viscosity (3#, 60 RPM @ 25°C)	<2000

Note: These properties are only typical, and do not represent product specifications

APPLICATION CHARACTERISTIC AND ADVANTAGES

Coadd™ DF-6022 is recommended for water-borne coating, printing inks and adhesive applications, has wide range of compatibility and formulation adaptability. It has excellent bubble bursting performance and wide range pH adaptability. The product is easy to handle, and can be added in any stage of coating production. More effective in emulsified epoxy systems.

Suggested dosage base on total formulation: 0.1 – 0.5%.

The above dosage is only for orientation, optimal levels should be determined through laboratory tests.

SAFETY NOTICE

Before using the products, please refer to SDS for detailed safety data, handling and storage procedures recommended.
